

Shrink Wrapping Price Guide 2025

The rates shown below are calculated by **square foot**, using the same dimensions that are used for calculating winter storage. The shrink wrap cover extends over the hull sides of your boat. A zippered access door and interior mildew protection are included. Additionally, we will monitor your shrink wrap cover for the winter storage season in which it was installed. The Environmental/Disposal charge covers the shrink wrap removal and disposal cost.

Bimini tops, enclosures, sails, dodgers and antennas must be removed prior to the installation of the winter cover. When not removed by the owner, Larsen Marine will handle the removal at an added expense. Painted hulls are not recommended for shrink wrapping and require additional precautions.

Sailboats		
Mast Down	Mast Up	Environmental/Disposal
\$2.80	\$3.40	\$75.00
Powerboats		
Low Profile	Fly Bridge/Aft Cabin	Environmental/Disposal
\$2.80	\$3.40	\$75.00

Note: Shrink wrap is designed to last one winter season only. Shrink wrap that is not removed at the end of the winter season could have adverse effects to the boat. All damages incurred by using a shrink wrap cover for more than one season are entirely the responsibility of the boat owner. This includes, but is not limited to, damage to the hull, stanchions, paint/gel coat blistering, mold, insects, etc.

Install Owner's Cover	\$1.75	Boats stored inside – cover w/clear dust cover	\$0.75
